

0.3 REVISION RECORD

The first edition of the Quality Manual was released on 05.05.2005; subsequently, the document had undergone several changes including incorporation of ISO 9001:2008 changes. Similarly, the first edition of EMS Manual was released on 01.01.2007. The top management has taken decision to integrate these two systems, this IMS Manual has been prepared and the requirements of these two management systems have been integrated in a structured manner.

The IMS Manual is assigned with an Issue Number for the whole document, and, sections are given separate revision status. The revision status is given for each section and is indicated in the "Footer". Whenever changes are made to any section / clause, the revision number is incremented by "1" for that section. Revision details are maintained under each Issue Number. If the number of revisions equals or exceeds 10, then the Issue Number is incremented by "1". Revisions made to this document is recorded in the below table.
